Eco-participation amounts applicable as from January 1st 2025

ECO-PARTICIPATION MODULATION

Eco-participation modulation criteria have applied to professional EEE according to the conditions below:

- For all EEE containing at least 20% plastic by mass and containing flame retardants:
 - ▶ **Criterion 1 PREMIUM "Absence of Bromine in plastic parts containing Flame Retardant (BFR)"**
absence of bromine in all plastic parts of more than 25 grams containing flame retardants, excluding electronic cards and power cables.
- For all EEE mentioned below:
 - ▶ **Criterion 2 PREMIUM "Availability of spare parts"**
for a period equal to the following period, for each equipment type eligible:
 - Refrigerating appliances with a direct sales function: 10 years;
 - Chest freezers: 15 years;
 - Electronic displays: 10 years;
 - Welding equipment: 15 years;
 - Emergency lighting systems: 10 years;
 - Printing systems: 6 years;
 - UPS (Uninterruptible Power Supply) < 50 cm: 10 years;
 - UPS (Uninterruptible Power Supply) ≥ 50 cm: 12 years;
 - Generating sets: 10 years;
 - Screwdrivers, drills, chisels: 17 years;
 - Valve gearmotors: 10 years.

- For all EEE containing batteries or accumulators:
 - ▶ **Criterion 3 PENALTY "Non-separable Battery";**
- For all EEE containing plastic resins:
 - ▶ **Criterion 4 PREMIUM "Incorporation of recycled plastic materials"**
Premium calculated on the basis of the total mass of recycled plastic materials (RPM) incorporated into the equipment.

Prerequisite: for a RPM to qualify for a premium, it must be derived from the recycling of waste collected or supported under an extended producer responsibility (EPR) scheme. 2 levels of premiums are established according to the origin of the recycled material.

- For MRP from post-consumer waste, excluding food-grade resins the calculation base is established on the basis of €450/t excl. VAT, to be reduced to the mass of the equipment.
- For RPM from post-consumer WEEE, the calculation base is established on the basis of 540€/t excl. VAT to be reduced to the mass of RPM of the equipment.

The amount of the premium must be calculated reference by reference, in compliance with the rules of the OCAD3E technical note. The products concerned will have to be the subject of a pre-declaration and after validation by ecosystem, the declaration can be made at the same time as the declaration of marketed products.

For more precisions about eligible products and required documentary evidence, please consult the [technical note about modulation criteria applying to Professional EEE](#).

Sub-family affected by a change.

Eco-participation code affected by a new price.

Family	Equipment types and examples (non-exhaustive list)	Net weight (kg)	Regulatory category	Eco- participation code	Reference amount excl. VAT / kg	Eco-modulation criteria		
						1 Absence of BFR	2 Spare parts	3 Non-separable battery
Professional equipment for installation of LV electrical network and communication network ⁽¹⁾								
SMALL EQUIPMENT OF DIMENSION LESS THAN OR EQUAL TO 50 CM	10377 Small equipment ≤ 50 cm - Small equipment fixed to the frame (overhanging or recessed) • Switch, intensity variator, electrical outlet, socket (RJ, DTI, DCL...) • Covering products (covers, cover plates, brackets, back boxes) • Pre-wired pre-fitted floor box - Small equipment of cabinets, boards, boxes, desks, fixed or mobile • Equipment for switching or protecting circuits and persons, for junction, control programming, and equipment for multimedia networks: circuit breaker, switch/disconnector, motor protection switch, surge arrester, arc detector, terminal block/comb, electrical outlet and its base, contactor, relay, programmable time switch, patch bay, communication module, terminal block, fuse, controlling and signalling transformer... • Programmable logic controller for technical management of buildings, monitoring interface, micromodule... - Construction power cabinet, vehicle charging cabinet (except public charging stations in P12.03)... - Enclosure and electrical panel box without equipment - Pillar, multiplug, trunking, electrical conduit, adapter and extension cord (professional by nature) - Equipment for photovoltaic installations (except photovoltaic panels and UPS)	Not applicable	Cat. 05	P12.01	€0.182	-€0.021	Not applicable	+€0.080
LARGE EQUIPMENT OF DIMENSION MORE THAN 50 CM	10378 Large equipment > 50 cm - Power capacitor, battery, of compensation, busway... - Construction power cabinet, vehicle charging cabinet (except public charging stations in P12.03)... - Enclosure and electrical panel box without equipment - Pillar, multiplug, trunking, electrical conduit... - Equipment for photovoltaic installations (except photovoltaic panels and UPS)	Not applicable	Cat. 04	P12.02	€0.106	-€0.021	Not applicable	+€0.080
PUBLIC CHARGING STATIONS FOR ELECTRIC VEHICLES	10379 Vehicle public charging station - Charging station for electric vehicles installed in places accessible to the public (streets, service station...)	Not applicable	Cat. 04	P12.03	€0.106	-€0.021	Not applicable	+€0.080

⁽¹⁾ Sub-assemblies (e.g. accessories, engines, power supplies...) specifically intended to be integrated into EEE must be recorded in the relevant EEE sub-family.

- Sub-family affected by a change.
- ⊙ Eco-participation code affected by a new price.

Family	Equipment types and examples (non-exhaustive list)	Net weight (kg)	Regulatory category	Eco- participation code	Reference amount excl. VAT / kg	Eco-modulation criteria		
						1 Absence of BFR	2 Spare parts	3 Non-separable battery
Professional equipment for production, conversion and storage of LV electrical energy⁽¹²⁾								
SMALL EQUIPMENT OF DIMENSION LESS THAN OR EQUAL TO 50 CM	10380 Small equipment ≤ 50 cm - Equipment which main function is to convert/transform/store LV electrical energy within a LV distribution network • UPS (Uninterruptible Power Supply), of a power less than 375 kVA, with triple-phase output • Inverter (except photovoltaic inverter) • Rectifier, current charger with a power: - less than 3 kVA, rack-type or tower-type, of weight > 10 kg - between 3 kVA and 300/337 kVA, cabinet-type, of weight > 10 kg • Frequency converter	Not applicable	Cat. 05	P13.01	€0.144	-€0.021	-€0.020	+€0.080
LARGE EQUIPMENT OF DIMENSION MORE THAN 50 CM	10381 Small equipment > 50 cm - Energy storage equipment or system, stationary, not for residential use, modular or not and integrating control and protection devices, integrating batteries or not - Solar thermal panel	Not applicable	Cat. 04	P13.02	€0.115	-€0.021	-€0.020	+€0.080
➤ GENERATING SETS	10382 Generating set - Mobile - Fixed with a power less than 375 kWe	Not applicable	Cat. 04	⊙ P13.03	€0.057	Not applicable	-€0.010	+€0.080
GENERATORS AND TRANSFORMERS	10383 Generator and transformer - Low voltage electrical generator for small wind plant or hydroelectric micro power station - Low voltage (in or out) dry-type transformer of less than 375 kVA	Not applicable	Cat. 04	P13.04	€0.033	€0.021	Not applicable	+€0.080

Regulatory categories defined by Article R543-172-II of the French Environment Code:

- Cat. 01:** Temperature exchange equipment
- Cat. 02:** Screens, monitors, and equipment containing screens having a surface greater than 100 cm²
- Cat. 04:** Large equipment
- Cat. 05:** Small equipment
- Cat. 06:** Small IT and telecommunication equipment

IMPORTANT:

List of equipment is non-exhaustive (for more information on the equipment concerned, consult the [Notice to Producers](#) on 27 November 2014, or contact **ecosystem**).

In accordance with the provisions of [Article R543-172-III of the French Environment Code](#), electrical and electronic sub-assemblies intended to be connected to each other in a modular and reversible way* by means of tangible or intangible joins are considered to be EEE within the scope of the contract (e.g.: replacement pump for industrial cleaning equipment...), except when they are sold to Producers of electrical and electronic equipment in which the said subassemblies are intended to be integrated (e.g.: ballast sold in OEM to a lighting manufacturer, specific engine sold in OEM to a pump manufacturer, pump sold in OEM to a suction system manufacturer for a dental treatment station, input/output module sold in OEM to a manufacturer of industrial PLCs...).

*A join (excluding any bonding, welding or crimping) is considered reversible when it can be separated by mechanical actions, such as unscrewing, by simple and commonly used tools.
